Overview of the Program

Goals of the Program

Intersect would like to sponsor a DRep Pioneer Program by inviting selected members to deliver the course to the Cardano community as Pioneer Workshop Leaders.

By the end of the program, a significant part of the community will be equipped with the knowledge and skills needed to effectively participate in the new governance role – DRep.

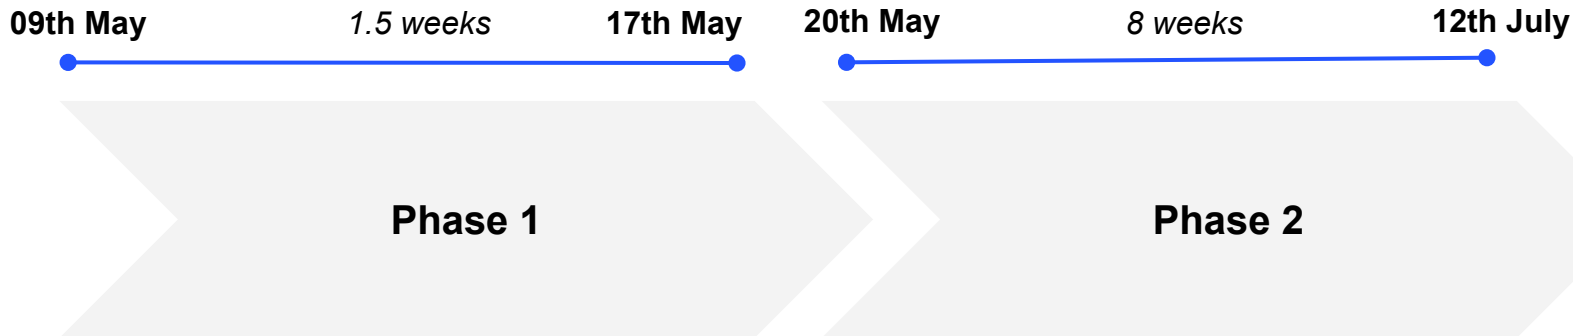

A major goal of this initiative is to develop a continuous learning program that will support the first cohort of DReps' to be able to effectively perform their role in Cardano's proposed governance design.

A further goal of the program is to create materials that can be used 'standalone' independent from the training courses, so that a potential DRep can train themselves on what is required in an intuitive and clear way.

Expectations

Since this initiative holds significant importance for the Cardano community, we anticipate Pioneer Workshop Leaders to collaborate closely, share resources and insights, and take ownership of their roles to decentralize this program effectively.

Roadmap

The selected applicants of the DRep Pioneer Program become the Workshop Leaders. During Phase 1, these leaders will focus on completing and thoroughly reviewing the program content and materials.

During Phase 2 the Pioneer Workshop Leaders will be accountable for delivering the DRep Pioneer Program within their respective region or community.

DRep Pioneer Program

Phase 1

Acceptance Criteria

- The content has undergone a final review by relevant stakeholders, including subject matter experts.
- The content has been verified to align with the learning objectives of the program.
- The content has been evaluated for relevance, ensuring that it addresses the key concepts and topics outlined in the curriculum.

DRep Pioneer Program

Phase 2

Acceptance Criteria

The DRep Program has been successfully delivered to the Cardano community by the designated Pioneer Workshop Leaders.

1. Workshop sessions have been conducted according to the agreed-upon schedule and duration (Recommendation: 1 full day: 6 hours of lecture + lunch time + breaks).
2. Workshop Leaders have effectively engaged participants and facilitated interactive discussions, and learning experiences.
3. Participants have provided positive feedback regarding the workshop content, delivery, and overall experience.
4. Workshop Leaders have demonstrated proficiency in addressing participant questions, concerns, and providing clarification as needed.
5. Workshop Leaders have upheld professionalism and integrity throughout the delivery of the program, maintaining a positive and supportive learning environment and following the code of conduct.
6. Any issues or challenges encountered during the workshop delivery have been promptly addressed and resolved to the satisfaction of all stakeholders.
7. Workshop Leaders have provided post-workshop reports or reflections to capture insights, lessons learned, and recommendations for future improvements.

Program Curriculum

Collaborating together through a new working group at Intersect, members and the support team will co-design the curriculum with the aim to unify the content, which the DRep Pioneer Workshop Leaders deliver directly. Some module ideas to get us started could include the below:

MODULE 1

During module 1 we will provide participants with a comprehensive understanding of key aspects of Cardano's blockchain ecosystem, focusing on its on-chain governance design, gaining deep insights into the expectations and responsibilities of the DRep role. Additionally, the module will highlight the importance of delegation, emphasizing its role in decentralization.

- Cardano's on-chain governance design
- DRep role
- Why delegation

MODULE 2

In module 2 we will focus on the Delegated Representative Code of Conduct specifically for CIP 1694.

Program Curriculum

MODULE 3

In the third module we will provide an overview of potential reward schemes for DReps.

[Drep Rewards](#)

MODULE 4

Overall, the module focuses on guiding individuals through the process of becoming involved in the DRep ecosystem. It covers essential steps such as understanding how to become a DRep exploring opportunities for engagement within the community, and reviewing available tools to facilitate participation.

- How to become a DRep
- How to engage with the community? Review available tools

OPTIONAL

- STEM/ecosystem model

Learning Outcomes and Expectations

Participants who take this program will be able to:

1. Understand the fundamentals of Cardano's on-chain governance design
2. Understand the role and expectations of a DRep
3. Gain the skills to effectively become a DRep - both the practical and the 'softer' skills (e.g. marketing, communication, building relationships)
4. Be able to engage with the community with available tools

Program Schedule

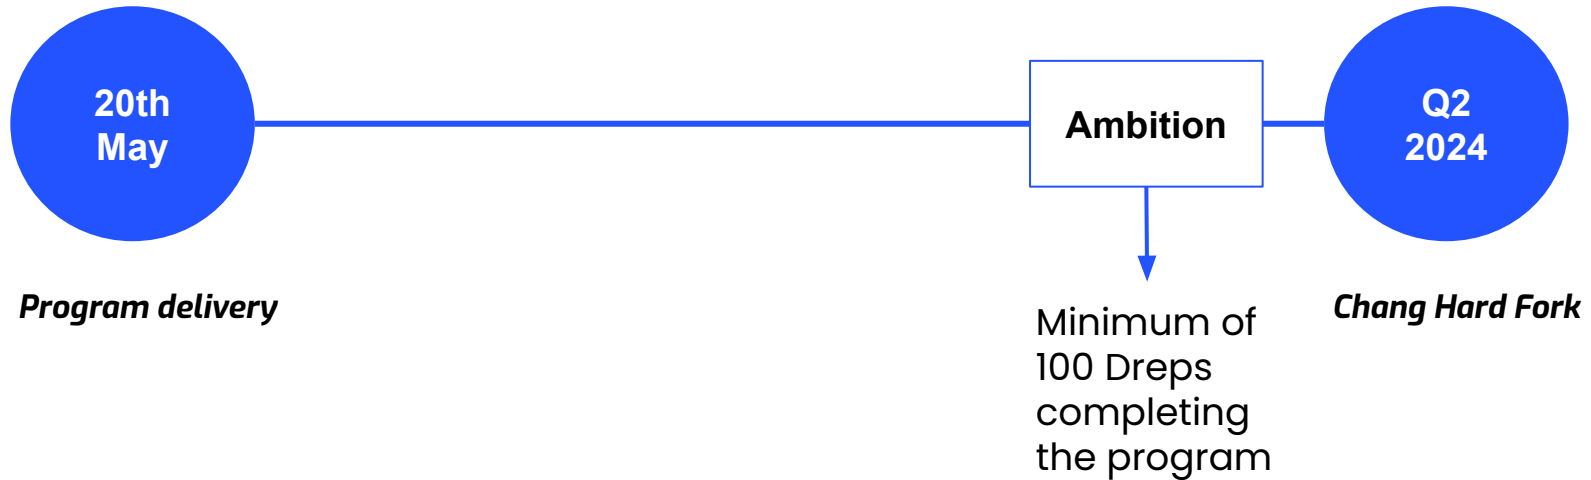

6 hours of lectures and practicals to test and apply the understanding of the concepts and ideas introduced in lectures, accompanied by video examples, guest speakers and other written material, followed by QA-sessions. Lectures will be delivered by a list of Intersect members as **Pioneer Workshop Leaders** .

DReps will be able to discuss the course and ask (and answer) questions on Discord forums, and we will try to keep the course as interactive as possible by responding to frequent questions and suggestions.

We will also publish walk-through videos for practical exercises related to how to become a DRep by using SanchoNet.

All the lectures/material will be published in a playbook format on SanchoNet. The idea of this playbook is to facilitate the DRep to follow the program and to have all the resources available in a single point.
